

Powerful Integration. No Software Installation.

Integrated Security Management with Embedded Software. eMerge – the all-in-one browser-managed system that gives both IT and Security Managers complete confidence and unparalleled ease.

Everything you need to install and manage the system is embedded within the eMerge panel. So you'll have no server software, no client software, no gateway and no connectivity issues burdening your staff or system. What will you have? Browser-based access to your facilities from anywhere in the world, and an embedded security management application that's so powerful and so easy to use, that once you try it you'll accept nothing less.

So try it. Log on to www.ieib.com/tryemerge to use an actual system. Then admit there's no other security platform like it and call. **1-800-343-9502**
