

IEI celebrates its 30th year as a leading manufacturing company in the electronic security industry. With approximately 70 employees and product lines that include, Integrated Security Management Systems, Network Access Control, Stand Alone Access Control, Keypads, software managed Electronic Locksets, and Intrusion Detection products, IEI has evolved into the “*Trusted Access Solutions*” company.

In 1977 IEI introduced “Glass-Gard” a glassbreak detector to the industry. This established IEI’s long term relationship with business partners with the US and around the world.

1987 Tri-Gard audio detector was added and in 1988 IEI began to distribute in the US, the Viper Selective Vibration detector out of the UK.

January 1989 IEI acquired Guard-Aware, Inc., a local company that had a lot of success during the late 70’s and early 80’s as a manufacturer of security control panels. A critical move for IEI was the acquisition of Guard-Aware’s manufacturing in Bridgewater, Massachusetts. For the first time in IEI’s history, IEI controlled the manufacturing process for all of its products.

Throughout the 90’s IEI took off with several products: Door-Gard; 212i and 232i keypads, Secured Series, Hub Systems, and the prox.pad. IEI also acquired ECCO Industries that provided voice recognition access control systems. Then in May of 1991 IEI consolidated its Needham and Bridgewater facilities and moved to Canton, Massachusetts.

The year 2000 marked the introduction of the LS Series electronic locksets. In 2004 the company introduced its flagship product “eMerge”, an Integrated Security Management System with embedded software. eMerge combines powerful systems integration with an easy-to-use web browser interface. The Max 3 Access System, which is the next evolution to the successful Secured Series line of access systems, was introduced in 2007.

IEI understands the continuing demands to provide the highest quality products that are easy to use and install; products that can scale from small installation to large multi-site environments; and for providing a continuing commitment to excellent service and support.
