

ADVANTAGE\_Allstar SuperBelt

## Total Belt Drive

It's not just any belt-drive garage door opener, it's an Allstar MVP SuperBelt.

Look under the cover! Our SuperBelt is the only garage door operator to use a total belt-drive system. Shock absorbing. Durable. Reliable. Quiet. You also get a lifetime warranty on its powerful motor and drive belt.

What you won't find are plastic gear sets or other quality compromises. Allstar operators are built using a refined, time-tested design and superior components.

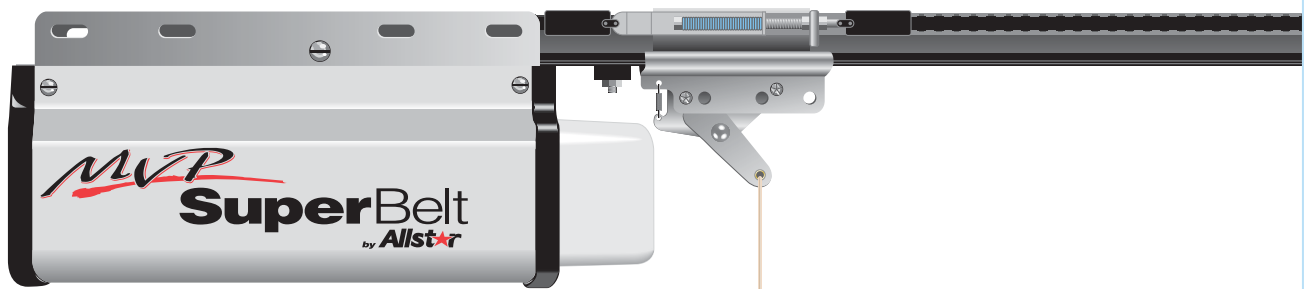

At Allstar, we're never satisfied until you own the Best.

INSTALLATION EASE\_Quik-Fit System

Allstar makes belt adjustment a snap with the new, patent-pending, Quik-Fit™ System.

**Allstar**  
We make the Best!

# Belts Are Just The Beginning!

UNDER THE COVER... superior quality

- **Total Belt-Drive™ System:** Unlike the plastic gear sets used in most garage door openers, the SuperBelt™ starts with a V-belt primary drive and adds a final drive using a steel-reinforced toothed, polyurethane belt.
- **Quiet Operation:** SuperBelt™ noise reduction enhancements include a precision machined, cast alloy drive pulley and sound deadening, advanced-composite cover and frame liners.
- **MVP Smart Circuitry:** The MVP Super-Belt™ is capable of accepting coded signals from multiple transmitters and wireless keypads. It also monitors every critical opener function every time your door opens or closes.
- **Quik-Fit™ Belt System:** Unique, patent-pending system that makes fitting and adjusting the final drive belt fast and easy.

## YOUR ALLSTAR SUPERBELT COMES STANDARD WITH THESE SUPER ACCESSORIES.

### Super Station Wall Control

Features a vacation switch with lock-out, illuminated three-button "open-close-stop" control, an independent light control, and a button for programming radio controls.

### Quik-Code™ Radio Control

Stylish, three-button transmitter with a full range of functions built-in. Quik-Code™ technology allows push-button programming, with no tiny switches to set. Will operate multiple doors and gates.

### SafeFinish™ Photo System

Detects obstructions in the door's path and reverses downward travel before contact is made.

For qualified, professional installation, see your local Allstar Dealer.
