

## TWIN KEY 9931 SERIES TRANSMITTER SPECIAL INSTRUCTIONS

The Twin Key transmitter now comes in two versions:

**Version 1 – Model 9931TK:** This transmitter has two buttons, each one controlling a separate coding switch within the transmitter. The button on the left controls the left side #8 x 3 coding switch. The button on the right controls the right side #8 x 3 coding switch. This transmitter will control two totally independent 9931 receivers that have different code switch settings.

**NOTE: SWITCH NINE IN BOTH OF THE RECEIVERS MUST BE SET TO A ZERO (0) CODE SETTING. CODE SWITCHES ONE (1) THRU EIGHT (8) SHOULD BE SET IN DIFFERENT SETTINGS BETWEEN THE TWO RECEIVERS AND MATCH THE RESPECTIVE CODE SWITCH IN THE TRANSMITTER.**

**Version 2 – Model 9931TK6:** This transmitter also has two buttons, each one controlling a separate coding switch within the transmitter. The button on the left controls the #9 x 3 coding switch. The button on the right controls the #6 x 2 coding switch. This transmitter is identical to the old style 931TK transmitter and will operate one 9931 receiver and one 9931TK receiver.
